

GREEN NATURAL GAS: SIMPLE. AFFORDABLE. CLIMATE FRIENDLY.

As a bullfrogpowered location, we are choosing clean, pollution-free energy for our natural gas requirements. Bullfrog's green natural gas is sourced from a unique ground-breaking methane capture project situated on one of Canada's landfills. At the site, biogas is captured, cleaned up, and injected onto the national natural gas pipeline.

As a bullfrogpowered location, we are:

CHOOSING

a climate-friendly, net-zero emissions gas source

CHAMPIONING

a new, innovative green energy technology

SUPPORTING

community-based green energy projects

LEADING

the way to a renewably powered future
