

THIS LOCATION IS

What does it mean to be bullfrogpowered?

This location is choosing clean, pollution-free energy.

Bullfrog’s generators put green electricity and green natural gas onto the respective energy system to match the amount of electricity and natural gas this location purchases.

Where does Bullfrog Power come from?

Bullfrog’s green electricity comes from a blend of wind and low-impact hydro power sourced from new Canadian renewable energy facilities.

Bullfrog’s green natural gas is sourced from a unique ground-breaking methane capture project situated on one of Canada’s landfills. At the site, biogas is captured, cleaned up, and injected onto the national natural gas pipeline.

We are also helping to bring new renewable energy projects online, locally within this region as well as across Canada.

Why is being bullfrogpowered important?

By choosing Bullfrog Power, we are reducing our energy pollution, supporting the development of green energy projects across Canada, and creating a cleaner, healthier world for Canadians.

Can I switch my home to Bullfrog Power?

Yes. You can make the choice to support green energy too! Simply sign up online for Bullfrog Power at **bullfrogpower.com**
