

THIS LOCATION IS

**bullfrogpowered**[®]
WITH **GREEN** ELECTRICITY

What does it mean to be bullfrogpowered?

This location is choosing clean, pollution-free power.

Where does Bullfrog Power come from?

Bullfrog's green electricity comes from a blend of wind and low-impact hydro power sourced from new Canadian renewable energy facilities. We are also helping to bring new renewable energy projects online, locally within this region as well as across Canada.

How does Bullfrog Power work?

Bullfrog's generators put green electricity onto the grid to match the amount of electricity we purchase. Bullfrog ensures the energy going onto the grid on our behalf is from clean, renewable sources—displacing energy from polluting sources.

Why is being bullfrogpowered important?

By choosing green electricity with Bullfrog Power, we are reducing our energy pollution, supporting the development of green energy projects across Canada, and creating a cleaner, healthier world for Canadians.

Can I switch my home to Bullfrog Power?

Yes. You can make the choice to support green energy too!
